Materials Used

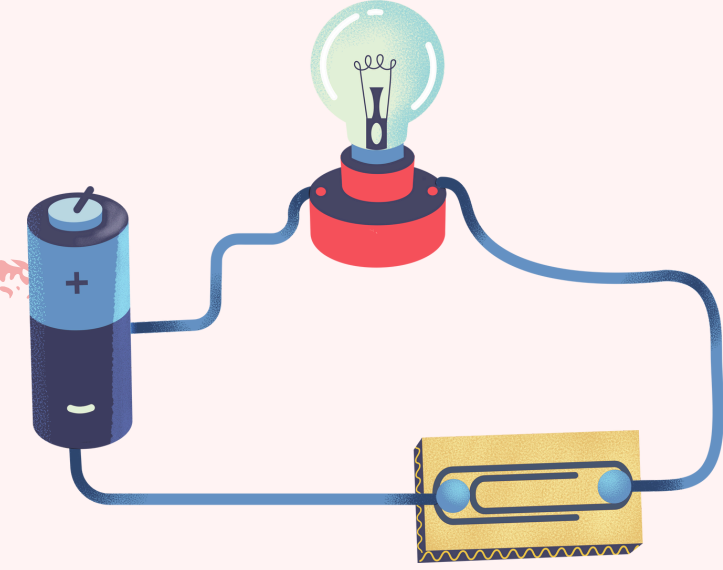

- Pringles tube
- Blue paper
- Blue foam
- Red paper
- White paint
- Red glitter
- Cotton balls
- Battery
- 2 wires
- Light bulb
- Cardboard
- Sellotape
- Rocks

Problems We Faced

Our circuit would not work because the switch would not touch the battery and also the back round kept on falling back so we put sellotape on the back to keep it up.

How we made the lighthouse

Step 1. Set up circuit

Step 2. We put the circuit into the pringles can

Step 3. We made the diarama/background

Step 4. We cut paper into strips and added glitter to the red strips and glued it to the can.

Step 5. We put it all together

Skills Learned

We learned how to work together as a team, fix problems, communicate, decision making, decorating skills.
